Local Government Act, 1933, s. 111. The Council has prepared the following Scheme:-

Arrangements made by the Cornwall County Council for securing the appointment of whole-time Medical Officers of Health for County Districts.

WHEREAS it is provided by sub-section (1) of section 111 of the Local Government Act, 1933, that the County Council shall, after consultation with the councils of the county districts situate wholly or in part within the County, formulate arrangements for securing, whether by means of a combination of districts or otherwise, that every medical officer of health subsequently appointed for a county district shall be restricted by the terms of his employment from engaging in private practice as a medical practitioner.

NOW THEREFORE the County Council of the Administrative County of Cornwall, having consulted with the councils of the districts wholly or in part within the County as aforesaid, DO HEREBY make the following arrangements for the purposes above-mentioned:—

- (1) For the purposes of the appointment of medical officers of health the Administrative County of Cornwall shall be divided into the six combined districts specified in the Schedule hereto.
- (2) The county districts comprised within each combined district shall be those mentioned opposite the number of each combined district in column 2 of the said Schedule.
- (3) On a vacancy occurring in the office of medical officer of health for any county district it shall be a term of the appointment of any person to fill the vacancy that he shall not engage in private practice as a medical practitioner.
- (4) Whenever a vacancy occurs hereafter in the office of medical officer of health in any one or more of the county districts mentioned in column 2 of the said schedule, the council of the district or districts in which the vacancy occurs shall make such provisional or other arrangements with the concurrence of the other county districts in the same combined district as will ensure the appointment at as early a date as possible of a single medical officer of health for all the county districts comprised in such combined district.

SCHEDULE.

		Area.	Population.
No.	Combined District.	Acres.	1931.
I.	Penzance Borough St. Ives Borough St. Just Urban West Penwith Rural	74,868	49,736
2.	Camborne-Redruth Urban Helston Borough Kerrier Rural	117,365	59,400
3⋅	Falmouth Borough Penryn Borough Truro City Truro Rural	113,163	56,002
4.	St. Austell Urban St. Austell Rural Fowey Borough Lostwithiel Borough Newquay Urban	111,545	54,747
5.	Bodmin Borough Bude-Stratton Urban Padstow Urban Camelford Rural Stratton Rural Wadebridge Rural Launceston Borough Launceston Rural	283,271	48,297
6.		163,914	47,963

The chief industries according to the 1931 Census were:-

	Males.	Females.	Total.
Agricultural	22,588	1,204	23,792
Clay, Sand, Gravel, etc. pits	3,883	41	3,924
Tin and Copper Mines	665	12	677
Other Mines	2,556	18	2,574
Stone Quarries, Mines, etc	2,068	14	2,082
Fishing	2,488	5	2,493

These figures exclude those persons out of employment on Census Day. In June, 1935, there were 7,378 unemployed, including 1,250 casual workers.

Birth Rate.

The birth rate in Cornwall in 1934 was the lowest on record and should be compared with that for 1892 when there were 8,757 births, a birth rate of 27.3 per 1,000 population.

Population.

The population enumerated at the Census of 1921 (June) was 318,956 (including an unknown number of visitors), and at the Census of 1931 (April) was 316,228, from which 3,708 must be deducted, the correction for visitors, giving a real population of 312,520.

According to the Census 1931, the following table shows the population of the administrative County of Cornwall from the year 1801:—

			Intercensal	
Year of		Down Life	increase or	D
Census.		Population.	decrease.	Per cent.
1801	•••	192,281		
1811	•••	220,525	+28,244	+14.7
1821	•••	261,045	+ 40,520	+18.4
1831		301,306	+ 40,261	+15.4
1841	•••	342,159	+40,853	+13.6
1851	•••	355,558	+ 13,399	+ 3.9
1861		369,390	+13,832	+ 3.9
1871	••• .	362,343	— 7,047	— 1.9
1881	•••	330,686	— 31,657	— 8.7
1891		322,571	— 8,115	— 2.5
1901	•••	322,334	237	0.1
1911		328,098	+ 5,764	+ 1.8
1921		320,705	— 7.393	— 2.3
1931	•••	317,968	— 2,737	— 0.9

(These figures include the Isles of Scilly).

It will be seen that the maximum population was in the year 1861, and the population has been falling since, with the exception of the intercensal period 1901—11.

During the intercensal period of 1921-31 there was a natural increase (i.e., excess of births over deaths) of 2.2% and a loss by migration of 3.1%, so that there was a net loss of 0.9%.

Excess of females over males. The excess of females was 20,270, a proportion of 1.136 females per thousand males.

The following table shows the distribution of the population according to sex and age:—

		Males.	Females.
•••	•••	· ·	4,288
	•••	19,140	18,502
		24,743	24,219
		23,432	25,118
		20,345	24,220
•••	•••	35,524	43,601
•••		21,325	29,171
		148,849	169,119
	 		4,340 19,140 24,743 23,432 20,345 35,524 21,325

For males there is a decrease for the ages 0—19 and an increase for ages 20 and over, and for females there is a decrease for ages 0—39 and an increase for ages 40 and over.

Density. For the County as a whole the density is 0.4 persons per acre; in the Urban districts 2.4, and the Rural districts 0.2. In the East Penzance Ward the density is 41.8 and in some of the Wards of Falmouth the density is 30.

Infant Mortality.

The infant mortality rate of 57 per 1.000 live births was more than in 1930 when it was 51 per 1,000 live births, the lowest on record. Of the 241 infant deaths, however, 154 were due to congenital debility, premature birth, malformations, etc. An increase of 14 over the figure for 1933.

Infant mortality	rates	:		Cornwall.	England & Wales.
1898		• • •	 •••	156	160
1900			 •••	126	154
1910	•••	•••	 •••	85	105
1911		•••	 •••	129	130
1920		•••	 •••	59	80
1930		•••	 •••	51	60
1931	•••		 •••	54	66
1932		•••	 •••	54	65
1933	• • •	•••	 •••	52	64
1934		•••	 	57	59

Death Rate.

The crude death rate is higher than that for England and Wales, as Cornwall contains a higher percentage of old people, owing to the low birth rate and to the migration of young adults. In 1882 the crude death rate was 18.8 per 1,000 population. The adjusted death rate is 10.8 as compared with 11.8 for England and Wales.

Natural Increase or Decrease.

There were 46 more deaths than births, a natural decrease rate of 0.1 per 1,000 of the population. The natural increase in England and Wales is 5.0 per 1,000 of the population; in the year immediately preceding the war it was 10 per 1,000, and in the period 1876-1880, when the birth rate was at its maximum, it was 14.5 per 1,000 of the population.

Chief causes of death at all ages, as given in Tables III and IV at the end of the Report.

Diseases of Heart a	ınd Bl	ood V	essels	То 	otal Deaths, 1934. 1,294	Rate per Cornwall, 1934. 305	1,000 Deaths. England and Wales, 1933. 269
Cancer					538	126	124
Respiratory disease					319	7 5	113
Old Age					29 3	69	35
Tuberculosis					257	60	67
Suicide and deaths	from	violer	nce		145	34	46
Congenital Debility			•••		154	36	32
Disease of Kidneys	etc.				155	36	46
Influenza					50	11	46

Of the 293 deaths ascribed to old age, 95 were of males and 198 of females. The comparatively large number of deaths from old age, diseases of the heart and blood vessels, and cancer is due to the higher proportion of old people in the population of Cornwall than in that of England and Wales as a whole. Nearly all the deaths from tuberculosis occurred between the ages of 15 and 55, while nearly all the deaths from cancer occurred in people over the age of 45 years. The deaths from congenital debility, etc., occurred in the first year.

SECTION B .- GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

- 1. (i) A list of Officers is given at the beginning of the Report.
 - (ii) (a) Laboratory Facilities.

The Redruth Clinical Laboratory under the charge of Dr. C. Rivers.

The Royal Cornwall Infirmary Laboratory, Truro, under the charge of Dr. F. D. M. Hocking.

The Prince of Wales's Hospital Pathological Department. Venereal Diseases specimens, milk specimens, etc., are sent to the Laboratory by the County Council.

The Laboratory of the Public Analyst, 11, Billiter Square, London, E.C.3. Specimens of water and food, etc., are sent to this Laboratory by the County Council.

District Councils make their own arrangements with various Laboratories.

(b) Ambulance Facilities.

Motor ambulances are provided and maintained by voluntary organisations, and there is a Joint Committee of representative members of the British Red Cross Society and The Order of St. John, the Cornwall Voluntary Aid Organisation.

The following are the motor ambulances:-

Home Service Ambulances:

St. Austell. Launceston. Bodmin. Truro.

Falmouth.

Affiliated Ambulances:

Camborne. St. Ives.
Camelford. Liskeard.
Hayle. Pendeen.
Helston. Penzance.
Illogan. Redruth.

During the year 1934, 2,695 patients were carried by these ambulances, a distance of 45,797 miles, at a cost of £1,146. The cost per patient averaged 10/5, and the cost per mile 8d. £582 was recovered from patients, etc., 51% of working expenses. These ambulances are not available for ordinary infectious disease, but are used in connection with the Council's Public Health Services. Ambulances for ordinary infectious disease are provided by the District Councils in connection with the Isolation Hospitals.

(c) Nursing in the Home.

This is undertaken by the 142 District Nursing Associations, 137 of which are affiliated to the County Nursing Association and employ 157 nurses. There are also four emergency nurses appointed by the County Nursing Association who are employed for the County Council in maternity cases and cases of Ophthalmia Neonatorum. When not required by the County Council they are employed by the County Nursing Association. There are also five unaffiliated Nursing Associations in the County.

The population in the affiliated District Nursing Associations is ... 293,980
The population in the unaffiliated District Nursing Associations is 17,450
The population in the unnursed areas is 4,475

The unaffiliated District Nursing Associations are Newquay, St. lves, St. Agnes, Perranzabuloe, and North Tamerton.

(d) Clinics and Treatment Centres.

Particulars of these are given in the sections dealing with Maternity and Child Welfare, Venereal Diseases, and Orthopaedic Treatment.

- (e) Hospitals. (See Tables at the end of the Report).
- 2. (i) The administration of the institutional medical services transferred from the late Boards of Guardians under the provisions of the Local Government Act, 1929. Development has continued on the same lines as reported in previous Reports. There are 11 Public Assistance Institutions, all of which are mixed Institutions including an Infirmary for the sick and the House part of the Institution. (See Table at end of Report).
- (ii) Poor Law Medical Out Relief. Arrangements have been made whereby all medical relief districts in the County will eventually, if there are medical practitioners residing or practising in such districts who are willing to contract with the County Council, be served by medical practitioners contracting with the County Council under the terms of the Scheme.

The County Council will contract with any medical practitioner, who is duly qualified and willing to serve on a panel of medical practitioners residing or practising in any medical relief district, for the provision of relief in a medical relief district to which the Scheme applies.

Poor persons granted medical relief will be able to select from the panel of medical practitioners for the medical relief district in which they reside, the medical practitioner they desire to attend them.

- (iii) Institutional Provision for the Care of Mental Defectives. The St. Columb Public Assistance Institution has been transferred from the Public Assistance Committee to the Committee for the Care of Mental Defectives, and has been adapted for the accommodation of 77 low grade children and 34 women of medium or high grade. The following accommodation is approved by the Board of Control in Public Assistance Institutions:—Falmouth, 10 adult males, 13 adult females and 24 boys under 16. Bodmin, 20 adult women and 5 adult men.
- 3. (i) Midwifery and Maternity Services. The Scheme for ante-natal examinations has been further developed, and three Maternity and Child Welfare Centres have been established by voluntary agencies, making a total of 23, including those in the Boroughs of Penzance, Falmouth, and Launceston.
 - (ii) Institutional Provision for Mothers or Children. No change.
 - (iii) Health Visitors. No change.
 - (iv) Infant Life Protection. No change.
 - (v) Orthopaedic Treatment. No change.
- 4. Nursing Homes Registration Act, 1927. There are 23 registered Nursing Homes. Exemption from registration has been granted to 15 Hospitals.

SECTION C .- SANITARY CIRCUMSTANCES OF THE AREA.

- 1. (i) Water. Rural Water Supply. This question has not been such an urgent one here as in some Counties, but a scheme for assisting Rural Councils in improving the water supply has been approved by the Council.
- 2. Rivers and Streams. No action has been taken during the year.
- 3. The Rural Water Supplies Act, 1934, places at the disposal of the Ministry of Health the sum of £1,000,000 to assist the provision or improvement of Schemes of water supply in rural districts in England and Wales. The County Council under section 57 of the Local Government Act, 1929, have power to contribute towards the cost of water Schemes.

The County Council have drawn up a Scheme under which grants may be made to Rural District Councils, provided such Schemes are approved by the Ministry of Health and are eligible for a grant from the Minister under the 1934 Act.

The following are the principles and conditions laid down by the County Council:—

- "That grants be made in aid of Schemes for the improvement of water supplies on the following conditions:—
 - (i) That each case, as and when it arises, shall be considered on its own merits as it is impossible to lay down precise rules by reference to which all cases arising can be settled automatically.
 - (ii) That the County Council shall be satisfied as to the necessity of the Scheme and its merits, both from the technical and financial sides, and that if no assistance is given an undue burden will be placed on the particular district or parish.
 - (iii) That the Rural District Council shall also contribute towards the Scheme by charging the whole of the deficiency to its general funds.
 - (iv) That adequate charges shall be made to consumers.
 - (v) That the Government Grant, if any, shall be taken into consideration before arriving at the figure of deficiency, i.e. net cost.
 - (vi) That the contribution by the County Council shall be in respect of capital outlay
 - (vii) That, generally, the basis of contribution shall be as follows:-
 - A proportion (say one-third) of the loan charges or of the deficiency, whichever is less, where the average general rate on the Rural District including the rate required for the scheme, exceeds (say) 10/6 in the £, any excess above that amount due to the water scheme to rank for grant.
 - (viii) Whatever basis is adopted for contribution in individual cases, all such contributions shall have regard to an over-riding limit of total expenditure (to be determined by the County Finance Committee) of not exceeding a certain poundage rate over the county administrative area."

Of the 10 Rural District Councils, two (Launceston Rural and Stratton Rural) report that no water schemes are necessary.

Applications have been received from:-

The West Penwith Rural District Council for a grant in aid of five schemes to cost approximately £43,536. (A grant was not approved by the Minister of Health).

The Truro Rural District Council for a grant towards four schemes estimated to cost £50,000.

The Camelford Rural District Council for a grant towards two schemes at an estimated cost of £1,166 and £320 respectively.

The St. Just Urban District Council for a grant towards a scheme estimated to cost £11,000. (A grant from the County Council was not approved).

The St. Germans Rural District Council for a grant in respect of a scheme of water supply for Crafthole at an estimated cost of £2,552. (Grants of £600 have been approved by the Minister and the County Council).

The St. Germans Rural District Council for a grant in respect of schemes for Calstock, St. Anne's Chapel, and Cox Park at an estimated cost of £4,536. (Grants of £800 have been approved by the Minister and the County Council).

4. **Schools.** The sanitary condition and water supply of the Schools is constantly receiving the attention of the Education Committee, and as opportunity offers Schools are connected with water and drainage schemes.

SECTION D.—HOUSING.

Housing Act, 1930, Part IV. No application has been made to the County Council by a District Council for a grant towards houses in rural areas.

SECTION E.—INSPECTION AND SUPERVISION OF FOOD.

(a) Milk Supply.

At a Conference in 1927 between representatives of the Health Committee of the County Council and the District Councils it was resolved that the District Councils should undertake the examination of milk samples for the presence of Tubercle Bacilli.

An enquiry made in 1934 as to the results:-

an enquiry made in 17	מס דני	to the	c resi	uits :—

18 Distri	cts	•••	•••	235	2

No replies were received from the other District Councils.

Much of the milk from the East of the County is sent to Plymouth and on two occasions the presence of Tubercle Bacilli was reported.

Examination of the cows by a Veterinary Surgeon and further examination of the milk failed to find any cow giving tuberculous milk.

The above examinations of milk samples were made by animal inoculation, a matter of six weeks, a very unsatisfactory proceeding.

In future it is hoped that an immediate microscopical examination will enable a diagnosis to be made at once.

Accredited Milk Producers Scheme. Under the Milk Marketing Board's Scheme every producer holding a licence to produce "Grade A" milk may claim 1d. a gallon for all milk sold through the Board. This Scheme came into operation on 1st May, 1935, and in July there were 127 holders of licences to produce "Grade A" milk.

Before May, 1935, there were in the County:-

6 holders of "Grade A" licences.

18 holders of "Grade A" (T.T.) Licences.

2 holders of Certified Milk Licences.

The County Accredited Roll. The County Accredited Roll was in existence before the Milk Marketing Board's Scheme came into operation. Producers on the County Roll (£1 fee per annum for membership of the Roll), are entitled to free Veterinary inspection, free sampling, and free use of the services of the Dairy Staff. In July, 1935, there were 65 members.

Appointment of Veterinary Officer. In April, 1935, Mr. L. E. Perkins took up his appointment as whole time Veterinary Officer of the Council, undertaking work for the Health Committee and for the Diseases of Animals Committee. The work for the Health Committee consists chiefly in connection with the production of "Grade A" milk and with the examination of cows under the Milk and Dairies Order, 1926, Part IV. Until this appointment was made no action had been taken under this part of the Order, apart from the few occasions when tuberculous milk was reported to the County Medical Officer.

There is a panel of part time Veterinary Officers approved by the Council for work for the Public Health Committee and the Diseases of Animals Committee.

Milk and Dairies (Consolidation) Act, 1915. One sample of milk was, after animal inoculation, found to be tuberculous. An examination of the cows from which it was alleged that the milk was obtained, and further inoculation tests of the milk, failed to find evidence that any of the cows examined were giving tuberculous milk.

Milk Supplied to Schools. Under the Milk Marketing Board's Scheme children may now obtain milk for ½d. for a third of a pint, subsidies being paid direct to the producers. In June, 1935, milk was supplied daily on School days to 17,723 School children; for 16,353 the ½d. was paid by the parents and for 1,370 payment was made by the Education Committee.

Milk and Dairies Order, 1926.

There were 58 notifications of non-pulmonary tuberculosis during the year, of which at least 30 per cent. were due to bovine infection. In children under 10 years of age it is estimated that 70 per cent. of cases of tuberculosis of cervical glands, 25 per cent. of bones and joints, and 55 per cent. of lupus, are due to bovine infection. The percentage diminishes as age of notification increases, and in adults a larger proportion are due to infection from human sources.

In 1933 there were in the County 239,177 cattle, and of these 97,622 were dairy cattle.

Under the Tuberculosis Order, 1925, the following work was done in 1934:-

Number of premises on which disease was reported, by	ut		
not confirmed by Veterinary Inspector	••	123	375 premises
Number of premises on which disease was declared t	to		inspected.
exist by Veterinary Inspector		252

(c) Suffering from tuberculous emaciation			112	100
(d) Otherwise affected by tuberculosis			39	J

Of the 259 animals slaughtered, in 151 animals the disease was so advanced that not more than a quarter of the market value was paid as compensation, and in 107 animals the disease was not so advanced, and not more than three-quarters of the market value was payable. In one case full compensation was paid.

The figures for the cows in milk were:-

Number slaughtered	 158
Full compensation paid	 _
One-fourth compensation paid	 87
Three-fourths compensation paid	 71

These figures are not very satisfactory; the object of the Order is to get rid of tuberculous animals in the early stages of the disease, and not to go on milking cows until the disease is advanced.

Year 1933, June-

Total acreage in	crops	and	grass	000,520		
Dairy Cattle				97,622	١	220 112
Other cattle		•••		97,622 141,490	Ì	259,112
Sheep				311,549		
Pigs				148,797		

A report by J. J. MacGregor, M.S., B.Sc., N.D.A., Assistant Economist, Seale-Hayne Agricultural College, shows that Cornwall and Devon have a definite surplus of cattle, sheep, and pigs, available for other parts of the country.

(b) Meat and Other Foods.

The County of Cornwall Act, S.68, when adopted by a District Council provides for the registration of manufacturers, vendors, merchants, dealers, and premises for the manufacture or storage or sale of ice-cream.

S.69 is in operation without adoption and provides for the notification of infectious disease and for dealing with infected ice-cream. It also provides for the inspection of materials, commodities or articles of food on such premises.

(c) Adulteration, etc.

Samples taken under the Food and Drugs (Adulteration) Act, 1928, etc.:-

(d) Chemical and Bacteriological Examination of Food.

Chemical examination of food is undertaken by the Public Analyst, Dr. H. E. Cox,. The Laboratory, 11, Billiter Square, London, E.C. 3.

Bacteriological examination of milk is undertaken by Dr. E. Wordley, at the Prince of Wales's Hospital, Plymouth, and Dr. F. D. M. Hocking at the Royal Cornwall Infirmary, Truro.

SECTION F.—PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES.

1. Hospital Accommodation. Under the Local Government Act, 1929, the County Council must prepare a scheme for the provision of efficient isolation hospitals.

The following Scheme has been approved by the Council and the Minister of Health:-

CORNWALL COUNTY COUNCIL.

LOCAL GOVERNMENT ACT, 1929, s. 63.

Scheme for the Provision of Hospital Accommodation for the Treatment of Infectious Disease within the County of Cornwall.

The Cornwall County Council, in pursuance of their powers under Section 63 of the Local Government Act, 1929, hereby make the following Scheme:—

PART I. INFECTIOUS DISEASE OTHER THAN SMALL POX.

(1) With a view to the provision of adequate hospital accommodation for the treatment of infectious disease other than Smallpox the County shall be divided into areas consisting of the County District or Districts specified in the second column of the subjoined table, and there shall be provided in the manner specified in the fourth column for each area not less accommodation than that specified in the third column and placed opposite to the number and description of the area.

GENERAL ISOLATION HOSPITAL ACCOMMODATION.

No. of Area. (1)	County Districts comprised in area. (2) Penzance Borough West Penwith Rural St. Just Urban St. Ives Borough	Required minimum number of beds for patients. (3) 25	Mode of Provision by Local Authorities under Acts. (4) Accommodation to be provided by the Penzance Borough Council. The other Councils to contract with Penzance Borough Council under section 131 of the Public Health Act, 1875, or a Joint Hospital Board to be formed under section 279 of that Act.
2.	Camborne—Redruth Urban	18	Accommodation to be provided by the Camborne—Redruth Urban District Council.
3,	Falmouth Borough Penryn Borough Helston Borough Kerrier Rural	21	Accommodation to be provided by the Falmouth Borough Council. The other Councils to contract with Fal- mouth Borough Council under section 131 of the Public Health Act, 1875.
4.	Truro City Truro Rural	18	Accommodation to be provided by the Truro City Council. Truro Rural District Council to contract with the City Council under section 131 of the Public Health Act, 1875.
5.	Newquay Urban	6	Accommodation to be provided by the Newquay Urban District Council.
6.	Bodmin Borough Fowey Borough Launceston Borough Liskeard Borough Looe Urban Lostwithiel Borough Padstow Urban St. Austell Urban Camelford Rural Launceston Rural Liskeard Rural St. Austell Rural Wadebridge Rural	38 (including an 8 bed cubicle block).	Accommodation to be provided by the Councils named in Column (2) and the Districts to be formed into a united District for Hospital purposes by a Provisional Order under section 279 of the Public Health Act, 1875, with a Joint Hospital Board as the Governing Body; or alternatively Councils to enter into agreements under section 131 of that Act.
7.	Bude Urban Stratton Rural	4	Accommodation to be provided by the Bude Urban District Council and the Stratton Rural District Council, who for this purpose shall enter into an Agreement under section 131 of the Public Health Act, 1875.

Required

		minimum
		number
No. of	County Districts	of beds
Area.	comprised in area.	for patients.
(1)	(2)	(3)
8.	Saltash Borough	13
	Torpoint Urban	(to be
	St. Germans Rural	reser-
		ved).

Mode of Provision by Local Authorities under Acts.

Accommodation to be provided by the Councils of the Districts named in Column (2) in accordance with agreements for the time being in force between the respective Councils of the one part and the City Council of Plymouth of the other, or otherwise to the satisfaction of the County Council.

- (2) Every Authority maintaining a hospital to which, in accordance with the provisions of this Scheme, patients resident in a district other than the district for which the hospital was provided are to be admitted, shall admit such patients so far as the accommodation available permits at the request of the Medical Officer of Health for the district in which the patient is resident, and every authority within the county providing or maintaining a hospital pursuant to this scheme shall, if in the opinion of the County Medical Officer of Health circumstances so require and accommodation is available, admit patients from any district within the county (other than one to be served by the hospital in accordance with the provisions of this scheme) the Council of which desires to be furnished with accommodation, and patients so admitted shall be admitted on such terms as may be agreed between the authorities concerned, or in default of agreement determined by a single arbitrator in accordance with, and subject to, the provisions of the Arbitration Act, 1889, or any statutory modification thereof for the time being in force.
- (3) Where in pursuance of paragraph (1) of this Scheme Authorities enter into agreements or contracts under Section 131 of the Public Health Act, 1875, any such agreement or contract may provide for the payment of a capital sum to the Council maintaining the hospital by the Council from whose district patients are to be received into the hospital, and shall provide for the payment of such other sums by way of annual retaining fees and weekly payments for maintenance and treatment of patients in the hospital as may be agreed between the parties thereto or in default of agreement as may be determined by a single arbitrator in accordance with, and subject to, the provisions of the Arbitration Act, 1889, or any statutory modification thereof for the time being in force.

PART II. SMALLPOX.

The County Council will provide hospital accommodation comprising not less than 10 beds for persons suffering from smallpox, and will, if and when so required by the Minister of Health, provide such further accommodation as he may consider necessary for the reception and treatment of persons suffering from smallpox in any part of the County.

2. Notifiable Diseases (other than Tuberculosis) during the year:

Disease.	Total cases notified.	Total Deaths.
Small Pox	_	_
Scarlet Fever	504	3
Diphtheria	90	4
Enteric Fever, including		
Paratyphoid	16	4
Puerperal Fever	10	} 26
Puerperal Pyrexia	26	<i>\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ </i>
Pneumonia	146	145
Erysipelas	54	5
Ophthalmia Neonatorum	21	
Encephalitis Lethargica	1	1
Acute Poliomyelitis	2	
Cerebro-Spinal Fever	1	2

Diphtheria. 59 notifications were in urban districts and 31 in rural districts, a total of 90 cases. The distribution is shown in the table at the end of the Report. Last year there were 120 notifications. The notifications are now as in the period 1900-1910. From 1910-1920 the notifications rose gradually to 883 in 1920. There was then a rapid fall to 96 in the year 1923, evidently due to the development of immunity in the affected districts. There were 5 deaths, a fatality of 5.5%. This is about the average, and would be less if it were possible to treat all cases on the first day of the disease. Before the introduction of anti-toxin, the fatality was 30%.

It is now possible by suitable injections to render a child immune to Diphtheria. This is very important for those thus rendered immune, but the numbers so treated are too small to affect the statistics. In a few districts offers have been made by the District Council and the Medical Officers of Health to immunise children against Diphtheria, but it is too early to state whether the offer is likely to be accepted to any appreciable extent.

Scarlet Fever. 327 cases were notified in the urban districts and 177 in the rural districts, a total of 504. It is doubtful whether this represents half of the cases, which are often so mild that no notice is taken of the disease. Isolation is impossible where there are many cases, and in any case is of little use in preventing the spread of the infection, seeing that so many cases are never notified at all. There were 3 deaths, a fatality of 0.5% of the notifications. This is a very mild disease now, very different from epidemics some years ago, when the fatality has been 30%.

Enteric Fever. There were 10 notifications in urban districts and 6 in rural districts, a total of 16 cases. There were 4 deaths, a fatality of 25%. The usual cause of a small epidemic now is milk, infected by a carrier. Most of the cases are single cases and no evidence is found as to the cause of the infection.

Of the non-notifiable diseases, there were 10 deaths from Measles and 8 deaths from Whooping Cough.

3. (a) **Cancer.** There were 538 deaths from Cancer as compared with 553 in the previous year, a rate of 126 per 1,000 deaths from all causes in Cornwall. The rate in England and Wales in 1933 was 124 per 1,000 deaths.

Radium. In addition to the National Centres in Hospitals associated with Medical Schools some additional Regional Centres have been established, and the Prince of Wales's Hospital, Plymouth, is one.

In 1934 the following patients from Cornwall were referred to this Hospital:-

Malignant			67
Non-malignant	•••	•••	4
			7

(b) Prevention of Blindness.

No action has been necessary under Section 66 of the Public Health Act 1925, all the necessary action being taken under the Council's Blind Scheme.

Ophthalmia Neonatorum.

	Cases						
Noti- fied.	At Home.	In Hospital,	Vision Unimpaired.	Vision Impaired.	Total Blindness.	Deaths	
19	15	4	19				

Many of the cases notified were very mild. An emergency nurse is supplied for home nursing when necessary.

(c) **Tuberculosis.** No action has been taken under the Public Health (Prevention of Tuberculosis) Regulations, 1925, or under Section 62 of the Public Health Act, 1925.

TUBERCULOSIS.

Much of the work is set out in tabular form, and will be found at the end of the Report. There are tuberculosis treatment centres at Penzance, Tuckingmill, Truro, St. Austell and Liskeard. There is a Sanatorium at Tehidy with 96 beds.

The Tuberculosis Officer, on receipt of a notification, informs the notifying practitioner that he proposes to follow up the notification unless the practitioner reports that there are special reasons why this should not be done.

The following Table shows the numbers and sexes for the year 1934:-

The 58 notifications of non-pulmonary tuberculosis were as follows:-

Bones and jo	oints			25
Intestines and	d perit	oneum	1	- 11
Glands			•••	8
Meninges			•••	4
Kidneys and	Bladd	er		6
Larynx			•••	2
Lupus				2

X-ray Apparatus. The only apparatus available is at Tehidy. As it is often impossible to exclude the possibility of Tuberculosis without an X-ray examination, it would be desirable for a second X-ray apparatus to be available for the Eastern part of the County.

Sanocrysin and Artificial Pneumothorax treatment are available at Tehidy.

Artificial Light Treatment. Three lamps are used:

- (i) A long flame carbon arc lamp, consuming 30 amperes.
- (ii) A vacuum type Mercury Vapour lamp, consuming 4 amperes.
- (iii) A Tungsten arc lamp, using from 5 to 10 amperes.

The current is direct, and the voltage 110.

Disease treated during the year, Lupus Vulgaris.

Advanced Cases of Tuberculosis. Provision is being made for 12 more male patients at Tehidy.

The number of cases of Tuberculosis on the registers of Medical Officers of Health on 31st December, 1934 was:

Males Females Totals	Fulmonary. 615 471 1,086	Non-Pulmonary. 192 186 378	Total. 807 657 1,464
Numbers per 1,000 population:—

The correctness of these figures depends on the care with which the District Medical Officers of Health carry out the requirements of Article 10 of the Public Health (Tuberculosis) Regulations, 1930. Article 10(5) is as follows:—

Every Medical Officer of Health shall from time to time, but not less frequently than once in every Quarter, revise the register kept by him by removing from the register:—

- (I) The entries therein relating to notifications which have been withdrawn by or with the consent of the notifying medical practitioner on the ground that the original notification was incorrectly made.
- (2) The entries relating to persons who are certified by the medical practitioner in attendance to have recovered, and
- (3) The entries relating to persons who to his knowledge have died, have ceased to reside permanently in the district or who, after adequate search, cannot be found resident in the district.

VENEREAL DISEASES.

Treatment Centres: (1) Tuckingmill, (2) The City Hospital, Plymouth. All Treatment Centres in the Country are open to all comers. The centre previously at the S.D. and E.C. Hospital, Plymouth, has been transferred to the City Hospital, Plymouth.

BLIND PERSONS.

A table will be found at the end of the Report (Table IX).

Blind children 5—16 years of age are educated at the Exeter Blind Institution. After the age of 16 years suitable blind persons are trained for various occupations at the South Devon and Cornwall Institution for the Blind, Plymouth.

After training, a blind person may become a home worker under the supervision of the Institution, or in exceptional circumstances may work in the Institution.

Apart from the above work there are four Home Teachers, three sighted and one blind, working under the County Blind Association who visit the homes of blind persons and teach Moon and Braile reading, and otherwise keep under observation all blind persons who wish to be visited. 6,204 visits were made to blind persons, and 613 lessons given. There are 48 Library members.

There are 23 home workers, and 2 journeymen in the Institution at Plymouth.

A grant is made by the Council to the County Blind Association for the assistance of the necessitous blind, excluding those under the care of the Public Assistance Committee. Efforts are made to bring the income of each blind person to 15s. a week including benefits by living with relations, with rent and attendance free. 141 grants were being made in March, 1935, varying from 5s. to £1 per month. The Public Assistance Committee dealt with 26 blind persons in Institutions and 34 by way of Out-Relief.

There were 793 registered blind persons on 31.3.35.

About 90 wireless sets are on loan to blind persons from the British Wireless Fund.

VACCINATION.

A Table is given at the end of the Report (Table X), setting out the work under the Vaccination Acts, which is now undertaken by the Health Committee. It will be seen that for the year 1933 only 761 children out of 4,163 were successfully vaccinated, i.e., 18.21%. Statutory Declarations of Conscientious Objection were received for 2,781 children, i.e., 68.14%, and 3 were found to be insusceptible to vaccination. For the year 1932 the corresponding figures were about the same.

In England and Wales in 1932 38.2% were vaccinated and there were 47.5% declarations of conscientious objection.

MATERNITY AND CHILD WELFARE.

Maternity Ward. A maternity ward with six beds is maintained by the Council at the West Cornwall Miners' and Women's Hospital, Redruth, under an agreement with the governing body of that Institution. 66 cases were admitted during the year, as compared with 63 in the previous year. The admissions were for the following reasons:—

Contracted Pelvis			- 11
Albuminuria			7
Unsatisfactory home condition	ons		7
Ante Partum Haemorrhage			3
Eclampsia		•••	8
Other Conditions			30

16 cases were submitted to Caesarian section. There were 2 deaths, one from sepsis, one from vomiting $(4\frac{1}{2} \text{ months})$.

Difficult cases from the Eastern part of the County may be admitted to the Prince of Wales's Hospital, Plymouth, The City Hospital, Plymouth, and the Royal Devon and Exeter Hospital, Exeter. Three cases were admitted to these Hospitals during the year.

Maternity Cases. In the 9 Institutions transferred to the County Council under the Local Government Act, 1929, there are 24 maternity beds, to which 68 women were admitted during the year, 43 being delivered by midwives and 16 by Doctors. There was one death from pulmonary embolism.

In the Maternity Ward at the West Cornwall Miners' and Women's Hospital, Redruth, of the 66 cases admitted during the year, 31 were delivered by midwives and 28 by Doctors. In the other cases confinement did not take place while in the Hospital.

Children's beds in the above 9 Institutions are used as required, but there is not always a special Ward reserved for children only. In 6 of the Institutions 21 beds are so reserved, and 20 children were admitted to these beds during the year.

Midwifery. The County is well covered by District Nurses who also undertake midwifery. Arrangements have been made for the nursing of Quethiock, Helland, Sennen, and Sancreed. It is hoped that Pendeen and Crantock will soon be included in nursing districts.

The following are unnursed areas:-

In the East.-Part of Calstock, South Hill.

In the West.-Morvah.

There are 137 District Nursing Associations affiliated to the County Nursing Association, employing 157 Nurses, with four extra Emergency Nurses.

Number of births in the County, 4,193. Number attended by midwives acting as midwives, 2,116, i.e., 50.46% of the births. Last year it was 52%. Number attended by midwives acting as maternity nurses, 1,491, i.e., 35.55% of the births. Last year it was 33%. Total attended by midwives in either capacity, 3,607, i.e., 86.02% of the births. Last year it was 86%. In 1914, midwives, acting as midwives, attended 26%, and acting as maternity nurses, attended 17% of the births, a total of 43%.

Medical help was sent for by the midwives acting as midwives in 45.13% of their cases:---

- (1) For the mother, 630 times, i.e., 29.77% of their cases.
- (2) For the child, 115 times, i.e., 5.43% of their cases.
- (3) During pregnancy, 210 times, i.e., 9.92% of their cases. Totals: 955 times, i.e., 45.13% of their cases. There were 53 Still births, i.e., 2.40% of midwives cases. Seven mothers died, i.e., 0.3% of midwives cases. Thirty-four babies died, i.e., 1.6% of midwives cases.

Squint. Arrangements are made for the examination of children under school age with Squint, and for the provision of glasses in necessitous cases. Six children under school age were so provided with glasses during the year.

Maternal Mortality. There were 8 deaths from Sepsis, and 18 from other causes connected with child bearing, making a total of 26 deaths. The following are the rates per 1,000 births, including still births in the last few years.

				Sepsis.	Other Causes.	Total Cornwall.	England & Wales.
1919-22	•••		•••	0.76	3.26	4.02	_
1924				0.58	2.12	2.70	3.90
1925				1.82	5.05	6.87	4.08
1926				0.62	2.47	3.09	4.12
1927				1.27	3.17	4.44	4.11
1928				1.71	3.86	5 .57	4.42
1929				1.94	3.24	5.18	4.33
1930			•••	0.86	3.87	4.73	4.40
1931				0.85	2.78	3.63	3.94
1932				0.87	2.85	3.72	4.06
1933		•••		1.81	- 2.72	4.53	4.23
1934				1.81	4.09	5.91	4.41

The rates for particular years are very variable owing to the comparatively small number of births. The rate for the last five years was 4.5 and for the previous five years 5.03.

Ante-natal Examinations. The Council have adopted a scheme under which a midwife may arrange with a medical practitioner for an ante-natal examination of her patients. 665 such examinations were made during 1934.

Consultants. A second opinion was obtained for 18 patients under the Council's scheme.

Work of the Health Visitors. The following is the work of the whole-time Health Visitors, and District Nurses acting as Health Visitors, for the years ended 31st March:—

	1931.	1932.	1933.	1934.	1935.
Health visits to mothers and children	59,294	56,422	61,509	58,812	57,888
Attendances at Clinics and Treat-					
ment Centres	292	285	324	369	364
Visits to tuberculosis patients	2,525	2,553	2,803	2,685	3,046
Sessions at Infant Welfare Centres	27 9	265	255	295	396
Lectures and talks to mothers	231	234	209	205	213
School inspections	645	651	677	6 7 9	683
Visits to homes of school children	5,643	5,357	6,460	6,161	6,189
School children followed up	2,061	2,692	3,216	3,531	3,520
Special visits to schools	311	608	893	1,133	1,142
Visits to boarded-out children				446	605

Excluding the Boroughs of Penzance, Falmouth, and Launceston, which have separate Maternity and Child Welfare Schemes, the County Health Visitors with the District Nurses acting for the County Council made the following visits:—

				1931.	1932.	1933.	1934.
To Expecta	nt Mothers—						
-	First Visits			2,588	2,739	2,875	2,826
	Total visits			11,088	14,198	12,588	13,583
To children	under I year (of age	_				
	First Visits			3,939	3,937	3,571	3,529
	Total visits		•••	24,164	28,875	24,804	24,951
To children	between the	ages	of 1 a	and 5 year	:s—		
10 cimaren	Total visits			32,258	32,634	34,048	32,937

Infant Welfare Centres. No Centres are maintained by the Council. The following were the attendances at the Centres maintained by Voluntary Associations in the County Maternity and Child Welfare Area.

	1932.	1933.	1934.
Number of Centres	14	17	16
By children under 1 year of age	2,393	2,632	2,699
By children between the ages of 1 and 5 years	4,693	5,584	6,412

Total number of children who attended at the Centres for the first time during the year:

	1932.	1933.	1934.
(i) Children under I year of age	253	256	298
(ii) Children between the ages of 1 and 5 years	138	148	197
Percentage of notified live births represented in (i)			
above,	6.80	7.0	8.38

In a rural county such as Cornwall most mothers find the distances too great to attend the Centres, and the Health Visitors follow up cases to their homes.

Emergency Nurses. Four emergency nurses are provided by the County Nursing Association for the use of the County Council when required for the nursing of cases of Puerperal Pyrexia, Puerperal Fever, and Ophthalmia Neonatorum. When not employed by the Council they are employed by the County Nursing Association and the District Nursing Associations.

Number of District Nursing Associations

Th

Work of the Cornwall County Nursing Association for the year ended 31st March, 1935.

Other Grants	•••		•••			£529	

The £4,432 from the County Council includes:—Health visits and School Nursing, £578; Grant for maintenance of nurse-midwives, £2,325; Public Assistance Committee, £651; and £475 old Ministry of Health grant now paid through the County Council.

The following grants are made to the General Account of the Cornwall County Nursing Association by the County Council:—

For establishing new Nursing Associations	 £250
For the training of midwives	 900
For the salaries and expenses of Inspectors of Midwives	 500
For the maintenance of emergency nurses	 150
Grant in place of the Ministry of Health Grant	 650

A total of £6,338 was paid by the County Council to the Cornwall County Nursing Association, but as mentioned above, some of the grants are paid over to the District Nursing Associations by the County Association.

ORTHOPAEDIC TREATMENT.

Facilities for treatment have been extended by the provision of 9 Clinics and also 14 beds at the Royal Cornwall Infirmary, Truro, with Dr. W. W. Rentoul as Hon. Surgeon.

The following Clinics and Hospitals are available for children up to the School leaving age:-

Clinics. The Clinics are open for one session a week, the Surgeon being present on one session in the month. The Doctor's days are :-

Council's Scheme.

Truro, 2 p.m., 1st Monday.

Penzance: 1,30 p.m., last Thursday. Tuckingmill: 10 a.m., 4th Wednesday.

St. Austell: 10 a.m., 3rd Tuesday. Wadebridge: 10 a.m., 3rd Friday.

Liskeard: 10 a.m., 2nd Saturday.

St. Just: 10 a.m., 2nd Thursday. Helston: 10 a.m., 3rd Monday. Bodmin: 2 p.m., 4th Saturday.

Devonian Scheme.

Launceston: 2.30 p.m., 1st Monday.

REPORT OF THE INSPECTOR OF MIDWIVES FOR THE YEAR 1934.

The number of Midwives who notified their intention to practise in the County during the year 1934 was 229. Of these 15 were to fill vacancies of Midwives who had ceased to practise in the County, and 1 was a temporary appointment for holiday work, etc. This leaves a total of 213 midwives available for work at the end of the year, being the same number of trained midwives as in the previous year, and 1 Bona-fide midwife less.

There are more midwives working under the C.C.N.A., and fewer have notified to work on their own account.

The Trained Midwives are working as foll	lows:		
Under Associations.		1933.	1934.
(a) Under the C.C.N.A.		157	161
(b) Independent Associations	s	3	3

There is an increase in the number of Medical Aid Forms sent by Midwives for advice during the Ante-Natal period.

Still Births. Of the 53 cases notified 13 were cases where a Doctor had been called in during labour, 40 in which the midwife was acting alone, of these 21 were macerated and 23 were premature.

Maternal Deaths. Of the 7 maternal deaths in which the midwife was acting as midwife, in 5 cases medical help was sought at labour, and in the other 2 cases during the puerperium for rise of temperature. Five of the deaths occurred in Hospital, and 2 at home. The causes of death were certified as follows:—

- 1. Delayed chloroform poisoning.
- 2. Post Partum Haemorrhage.
- 3. Influenza and Pneumonia.
- 4. Septicaemia.
- 5. Pneumonia.
- 6. Pelvic peritonitis.
- 7. Placenta Praevia.

Liability to be a Source of Infection.

Of the 58 notifications received:-

- 43 were on account of rise of temperature during puerperium.
- 15 were on account of infants with discharging eyes.
- 3 were for illnesses other than maternity.

Puerperal Pyrexia and Fever.

Of the 43 notifications received for rise of temperature during the puerperium only 38 were notified by doctors as Puerperal Pyrexia, the other 5 being cases in which the temperature subsided almost immediately. Of the 38 cases notified:—

- 8 were cases in which the midwife had acted alone during labour.
- 11 were cases in which Medical Help had been sought during labour.
- 19 were cases in which the midwife was acting as maternity nurse.

Special nurses were supplied and arrangements made for nursing patients in their own homes where possible, 11 were sent to hospital, 3 were already in Nursing Homes, and hospitals.

Of the 24 nursed at home I died.

Of the 11 sent to hospital 2 died.

The others made a good recovery.

Ophthalmia Neonatorum.

19 cases were notified; of these 15 cases were treated at home by nurses provided by the Council, and 4 were removed to hospital, All cases cleared up with no apparent damage to sight.

Emergency Nurses.

In addition to nursing cases of Puerperal Pyrexia, and treating cases of Ophthalmia Neonatorum the Emergency Nurses have attended 38 maternity cases.

Ante-Natal Care.

There are fewer Medical Help Forms sent for advice during pregnancy, owing to more cases being examined by medical practitioners under the Council's Ante-Natal Scheme. The midwives working under the Cornwall County Nursing Association have paid 16,409 visits to expectant mothers in their own homes.

Post-Graduate Course.

Thirty-two midwives were enabled to attend the Post Graduate Course held in Plymouth for one week. These refresher courses prove most helpful and keep the midwives up in their work with present day methods.

Lectures arranged by the Cornwall Midwives Association have been very well attended, and our thanks are due to the medical men of the County who have given such helpful lectures gratuitously.

M. RIDEN.

Inspector of Midwives.

RAINFALL FOR THE YEAR 1934.

Remarks.

Up to the end of November the rainfall throughout the county was markedly below the normal, but, as will be seen a very wet December brought the rainfall at some places above the average.

At Redruth the mean Temperature for the year was 0.6 deg. above the average.

The deficiency in Rainfall occurred mainly in February, November, and July, in the order given. The month with the greatest excess was August, followed by September, and April, with an almost equal excess (Aug. plus 1.51 in.; Sept., 0.91 in.; April 0.90 in.).

A. PEARSE JENKIN, Hon. Secretary.
